

Detroit Arsenal

BRAC 2005 Recommendation:

BRAC 05 recommendations transforms Detroit Arsenal into a more specific and complete Life Cycle Management Command by enhancing its already multi-functional and joint missions associated with both ground combat and tactical wheeled vehicle systems by consolidating like functions from other installations into a single source. This results in multiple consolidations that directly impact all aspects of weapon system management and cost reductions in acquisition and personnel.

Gains:

- TACOM Integrated materiel management from Rock Island Arsenal
- Joint robotics program development and acquisition activities from Redstone Arsenal
- Ground Forces initiative Development & Acquisition activities from USMC Direct Reporting Program Manager, Woodbridge
- Command and selected staff move from United States Army Garrison Michigan

Losses:

- Supply functions and consumables items management from the Inventory Control Point to Columbus
- Sea Vehicle Development and Acquisition to Naval Surface Warfare Center, Bethesda and Program Management and Direction of Sea Vehicle Development and Acquisition to Naval Sea Systems Command, Washington Navy Yard.
